Demonstration of Proposed Features

Date	25/10/2026
Team ID	Tanishka Jain
Project Name	**Electric Vehicle Market Performance & Insights**
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Executive Sales & KPI Dashboard	High-level landing page featuring aggregate annual EV sales, category breakdowns (SUVs, sedans, etc.), and top-performing manufacturers.	Implemented	**Yes**	Fully addresses **Emily's** core requirement for executive-level market overviews.
2	Battery Technology Benchmarking View	Technical matrix analyzing battery chemistry adoption (**LFP, NMC, NCA, Sodium-Ion, Solid-State**) against metrics like driving range and capacity.	Implemented	**Yes**	Built to satisfy **Dr. Sarah's** sustainability and technological trend research.
3	Geographic Production & Market Share Map	Interactive filled/symbol map visualizing manufacturing countries, production density, and regional market share percentages.	Implemented	**Yes**	Directly helps **David** analyze international competitor landscapes and production hubs.
4	Cross-Dashboard Dynamic Filtering	Set Actions and Parameter Actions allowing users to click a vehicle category on one sheet and instantly filter all other sheets.	Implemented	**Yes**	Enhances user experience by allowing stakeholders to drill down into custom slices of data
5	Unified Range Normalization Model	Custom Calculated Fields using Level of Detail (LOD) expressions to standardize driving ranges (WLTP vs. EPA) into a uniform mile/km metric.	Implemented	**Yes**	Solves the baseline data discrepancy problem flagged in the technical review phase.
6	Interactive Tableau Story Points	A narrative path ("Story Walkthrough") that guides non-technical users step-by-step through the core findings of the EV market analysis.	Implemented	**Yes**	Core story paths are functional; minor styling refinements are pending for final deployment.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
